

IRCCS

Istituto di Ricovero e Cura a Carattere Scientifico

Sacro Cuore - Don Calabria

Ospedale Classificato e Presidio Ospedaliero Accreditato - Regione Veneto

Direzione Scientifica

Research position at IRCCS Sacro Cuore Don Calabria Hospital

A position (collaboration contract for a research biologist/ biotechnologist) is open at our Institute (IRCCS Ospedale Sacro Cuore Don Calabria, Negrar di Valpolicella, Verona).

We are looking for a biologist/biotechnologist (or equivalent title) with experience in the research area of immunology, best (but not necessarily) if in the area of infectious/tropical diseases.

Education and experience

Degree in biology, molecular biology, biotechnology or equivalent. Documented experience in biomedical research.

Language level

The researcher should be fluent in English, have good writing skills (articles and research projects). Knowledge of other languages is an advantage.

Working conditions

Duration: 1 to 3 years, renewable. Contract: full-time. Salary range: to be defined according to level. Short term periods "in the field" in low/middle income countries may be required.

Selection process

The selection process will be based on the CV (pre-selection) and individual interview of pre-selected candidates. A technical test may be proposed.

How to apply

Applicants should send their CVs by e-mail to: segreteriaScientificairccs@sacrocuore.it indicating 'Application' as the subject of the e-mail.

Applications will be open until 15 November 2022. Applicants will be informed by e-mail of the results of the pre-selection.

Further information can be asked to Dr. Chiara Piubelli (chiara.piubelli@sacrocuore.it); please copy to segreteriaScientificairccs@sacrocuore.it).

Direzione Scientifica

Research position at IRCCS Sacro Cuore Don Calabria Hospital

A position (collaboration contract for a research physician) is open at our Institute (IRCCS Ospedale Sacro Cuore Don Calabria, Negrar di Valpolicella, Verona).

We are looking for a physician with experience in research areas of infectious/tropical diseases.

Education and experience

Medical degree, with a DTM&H and/or a Master's degree in Tropical Medicine/Global Health and/or a PhD or comparable qualifications. Documented research on infectious/tropical diseases and global health, preferably with previous experience of working in low/middle income countries. The candidate should be available for unsupervised field work in such countries.

Technical skills and experience

Clinical and research experience on infectious/tropical diseases or epidemiology.

Language level

The researcher should be fluent in English, have good writing skills (articles and research projects). Knowledge of other languages is an advantage.

Working conditions

Duration: 1 to 3 years, renewable. Contract: full-time. Salary range: to be defined according to level.

Further information can be asked to Dr. Dora Buonfrate (dora.buonfrate@sacrocuore.it; please copy to segreteriaScientificairccs@sacrocuore.it).

Direzione Scientifica

Research position at IRCCS Sacro Cuore Don Calabria Hospital

The IRCCS SCDI is looking for a biostatistician interested in collaborating in the IRCCS's clinical and biomedical research activities in the fields of infectious and tropical diseases, microbiology and global health.

Main responsibilities

- Basic biostatistical analysis and management of clinical, biomedical and epidemiological data
- Collaboration in the drafting of research protocols and data analysis plans.

Specific tasks

The selected candidate will be a member of the IRCCS interdisciplinary research team and her/his role and duties will be: cleaning and harmonising research datasets, in collaboration with data managers; biostatistical analyses of clinical, biomedical and epidemiological studies using descriptive and analytical methods and various statistical software packages; providing biostatistical knowledge to assist in writing research protocols as well as manuscripts derived from these analyses.

Education and experience

Degree in statistics, biostatistics, mathematics or equivalent. Experience in the analysis of clinical, epidemiological or other biomedical data will be an advantage.

Language level

The researcher should be fluent in English, have good writing skills (articles and research projects). Knowledge of other languages is an advantage.

Working conditions

Duration: 1 to 3 years, renewable. Contract: full-time. Salary range: to be defined according to level.

Selection process
